September 10, 2019

In providing reliable service, the District makes regular maintenance and repairs an important element of our water system improvement efforts. East Valley Water District (District) will begin a water main line replacement project on Del Norte Circle, Del Norte Place, Lomita Place, and Val Mar Circle starting September 16, 2019. This project will be performed in phases and is expected to be completed in late October 2019, depending on weather conditions.

On September 16 - 20, District staff will be in your neighborhood surveying the streets to locate existing utility lines. Construction will begin on Del Norte Circle on September 23 and progress north until reaching Val Mar Circle. During this replacement, there will be a brief temporary interruption to your water and wastewater services.

Please see the map on the back of this notice for more information on the homes that will be impacted by this project. Residents identified on the map are asked to refrain from the use of items that drain to the public wastewater during the interruption of services.

Construction is scheduled to take place Monday through Friday between the hours of 7:30 am – 4:00 pm. Street parking will be unavailable during this project.

In Phase 3, the District’s contractor, Mike Roquet Construction Inc., will make repairs to the pavement. Notices for no street parking will be placed in your street 24 - 48 hours before paving begins.

Please be cautious while driving through the work zone. For the safety of other motorists and construction crews, please follow all warning signs. We appreciate your patience as we make improvements to the water system. These upgrades represent a significant investment in maintaining a reliable water system for the community served by the District.

Sincerely,

Patrick Milroy
Operations Manager
ABOUT THE PROJECT
WATER MAIN LINE REPLACEMENTS ALONG ROCKFORD AVENUE

The District has identified water main lines on Del Norte Circle, Del Norte Place, Lomita Place, and Val Mar Circle that need to be replaced with a larger pipeline. By replacing the undersized water pipelines, the need for maintenance and leak repairs is significantly reduced. Additional project enhancements include the installation of fire hydrants to assist the fire department during an emergency, as well as aid in the maintenance of the water system.

The current Water Master Plan identified the need for a number of capital improvement projects. Selection of these projects have been based on the evaluation of the positive impact that they will each have on customers, maintaining existing facilities, and continuing to meet local, state, and federal requirements.

Shaded residences will be directly impacted by the scheduled project.

For more information about this project, visit www.eastvalley.org or call the District’s Operations Manager Patrick Milroy at (909) 806-4229.

CUSTOMER COMMITMENT
East Valley Water District is committed to keeping its customers well informed about projects and programs. As part of this commitment, the District is providing this notice to customers who may be impacted by this project.
