

DROUGHT EMERGENCY CONSTRUCTION RESTRICTIONS

DEVELOPMENT WATERING RESTRICTIONS

1. Short-term site preparation, using spray irrigation systems, is permissible between 8:00 pm and 6:00 am on all days, except Mondays.
2. Construction clean-up on and off-site may not use water to clear debris or clean the streets.
3. Required dust control measures are permissible by water truck or hose within active grading operation areas only.
4. Site run-off is prohibited during all phases of construction.
5. All water discharge resulting from pipeline flushing must be limited to quantities necessary to protect water quality standards.

ADDITIONAL INFORMATION

- Contractor must hold a pre-construction meeting on-site with a District representative prior to activity.
- Conditions may change based on the drought emergency. In the event of a change, the District will notify the designated contact person.
- Violation of terms will result in removal of temporary meter and issuance of a drought violation notice.
- For the full list of drought regulations, visit eastvalley.org/conservation.
